NEW METER INSTALLATION INFORMATION

A.D.O.H. PUBLIC WATER SYSTEM COMPLIANCE SUMMARY

SECTION 14.1: “No public water system shall provide service to a new building or residence in an unsewered area until the customer provides written documentation that the D.O.H. has approved plans for construction of a sewage disposal facility for the building or residence or that no disposal system approval is required by the D.O.H. for the building”. **(WE WILL NEED A LETTER STATING THAT FACT).**

SECTION 14.2.1: Prior to installation of a water meter, an “individual sewerage disposal permit” must be obtained by the customer from the county sanitarian. **(PROVIDE US WITH A COPY FOR OUR RECORDS)**

COST FOR ¾ INCH METER BOX INSTALLATION:

- 1.** A FLAT RATE OF \$ 700.00 (up front) for the new meter installation work plus a \$75.00 meter deposit and a \$35.00 service fee
- 2.** In addition, you will need to obtain a plumbing permit from us if you reside out of the Lakeview city limits. The cost of the permit is \$50.00. If you are inside the city limits of Lakeview you will need to obtain the permit from Lakeview City Hall.

If you need to have a road bore done to get service to your property the charge will be the cost of the road bore plus \$150.00
All larger meter boxes will be priced on a case by case basis.

Before a meter is set at a new installation, the master plumber must come in and purchase a plumbing permit. This will allow the meter to be set temporarily. It is a "Temporary" meter until the state inspector approves and signs the plumbing permit. Once you have a signed plumbing permit, then you have a permanent meter. Unless a yard hydrant is installed directly after the meter for preliminary construction purposes upon prior approval from our water operator.
